**Statement issued by the UN Independent Fact-Finding Mission on Libya
about the Recent Violence in Tripoli**

The UN Independent Fact-Finding Mission on Libya condemns the resurgence of politically motivated violence in Tripoli and other parts of Libya last week, in violation of international human rights law and potentially international humanitarian law. The Mission therefore calls on all parties to protect civilians and refrain from violent acts, which it shall document for the purposes of establishing international accountability in accordance with its mandate to investigate violations of international human rights law and international humanitarian law that have occurred on Libyan territory since 2016.
