

## Our inclusive, global constituency for rights

- Access to human rights education
- New narratives, messengers and tools
- Alliances between civil society, States and others
- Vibrant civic space, reversal of oppressive measures
- Engagement with human rights defenders

## Fostering Peace and Security

- Accountability and transitional justice approaches
- Full respect for international humanitarian law and international human rights law, including the right to a healthy environment, in conflict and crisis situations
- Human rights ecosystem, including civil society, feeds early warning and early action
- Inequalities, alongside unaddressed grievances and exclusion, recognized as strategic risk
- Heed lessons of the past

## A Human Rights Economy

- Strengthened fiscal self-reliance, and international cooperation on taxation and on illicit financial flows
- Ringfenced national investments in health, the environment and other public goods
- Human rights guardrails in the workings and reform of international financial institutions and architecture
- Mandatory corporate due diligence for human rights harms, including those related to environmental degradation
- Improved multilateral framework for debt relief and restructuring, prioritizing social spending, sustainable development and climate action over debt servicing

## Technology and science for all

- Human rights at the centre of development, use and governance of technology, including generative Artificial Intelligence
- Shift to regulation and binding industry-wide standards, with robust provisions on due diligence, transparency and accountability
- Multistakeholder Digital Human Rights Advisory Mechanism
- More attention to the right to benefit from science
- Bridging the digital divide
- A voice for all, especially States with limited resources and most often marginalized communities, in shaping the technological environment with greater transparency

## Strengthening governance

- End all forms of discrimination
- Meaningful participation of all in public life, including economic and environmental decision-making
- A culture of respectful discourse, online and offline, rejecting disinformation and hate speech
- Accountability, including of corporate actors
- New accountability approaches for environmental harms
- Access to justice by Indigenous Peoples
- Leadership on reparatory justice

## Relationship with our planet

- The right to a healthy environment embedded in domestic, regional and international legal and policy frameworks
- Reinforced accountability mechanisms, including increased use of strategic litigation
- Climate finance commitments upheld, including for adaptation, loss and damage
- Just transition to a low carbon economy, by placing people at the core of all policy-making and programmes, and an end to public subsidies that result in environmental harm
- Diversity of voices in environmental policy and decision-making, including those of Indigenous Peoples

## Youth, Children and Future Generations

- Real opportunities for youth to influence decision making
- Greater youth representation in politics
- Education fit for purpose
- Equitable and meaningful engagement with children
- Rights of future generations safeguarded

# Human Rights A Path for Solutions

## Our human rights system

- Effective global and regional human rights institutions and mechanisms
- Constructive engagement by all duty-bearers
- Strengthened human rights pillar through increased funding
- An end to selectivity and double standards in response to human rights crises
