

CLIMATE CHANGE AFFECTS CHILDREN'S RIGHTS

DID YOU KNOW?

Globally, 115 million children live in zones at high risk of tropical cyclones. Frequent extreme weather events, food and water shortages heighten existing social and economic inequalities and **threaten to reverse** progress towards improving **children's physical and mental well-being**.

Children and youth care deeply about the world they will inherit and are leading the call to meaningfully address climate change.

Let's take a child rights-based approach to climate action!
