

Good morning, My name is Milagro Gomez I currently have been working with families with children in public schools here in New Jersey. Have seen many of the changes that have evolved for our children and how these changes have effected their lives and education, struggles parents have to overcome in order for them to be successful and for children to obtain their diploma. Also the language barriers parents have and how the staff and teachers, Should have more empathy for all parents no matter where they have come from or where they have been and how much or how little they have. Parents of students should have the right to be involved in making decisions for their children education. Never the less Education is a constitutional right and should never be taken from our children. Because of skin color or because the children come from different places. Children of America should taught to embrace who they are and be able to learn important values throughout there education experience here this country. We Needs to educate our parents as much as we can. So they can see a better future for our children. Furthermore Social workers are needed in schools , and all children should be treated equally regardless of skin color and back grounds. The Jim Crow way must be abolished because it's not theory it's a fact. It happen here and it must be stopped.

Thank You, Milagro Gomez
