SUBJECT : OHCHR call for input "The impact of loss and damage from the adverse effects of climate change on human rights"

The impact of loss and damage from the Adverse Effects of Climate Change on Human Rights can not be over estimated . The immune system of Humans are being damaged and weakened thereby exposing the victims to attack of diverse diseases , ailments and Infirmities. Antiparasitic and Antibacterial Resistances are on the increase geometrically. These dreadful ,

negatively impactful and juxtaposed loss and damage does not allow Human beings to enjoy the Fundamental Human Rights to Live healthy on Earth Crust . Hybrid Ethnobotanical Survey carried out in 2023 indicates clearly that about 2,000,000,000 residents of sub Saharan Africa are negatively impacted most especially women , children , girls , albinos , Physically challenged and Unserved poor neglected Communities. These worrisome ugly and monstrous situations are being exacerbated by Poverty , Malnutrition and Malnourishment.

RECOMMENDATIONS : Innovative Design and Development of Green Remedies (Pills , therapeutics and Vaccines) in respect of Antiparasitic and Antimicrobial Resistances

**, as well as Immune Boosters for
weakening of Immune System of Humans.
The green remedies should be strategically
tailored towards achieving infinitesimal or
Zero Side Effects. Pharmacovigilance
neutral Solutions. Others are Proactive
Public and Private Sectors Partnerships to
achieve United Nations Sustainable
Development Goals specifically on Climate
Action , Renewable Energy , Gender
equality , Good Health and Well Being ,
Zero Hunger and No Poverty. Poverty
alleviation Programs and Palliatives should
be regigged to improve the quality of lives
of the Vulnerable groups and
Communities.**

Thank you.
